- Pain control and balance training
- Orthopedic rehabilitation
- Adaptive equipment training and home safety assessments.
- Therapeutic exercises
- Activities of daily living training
- Self-care and memory skills training
- Private pay services

DID YOU KNOW?

Three older Ohioans suffered a fatal fall per day in 2012.

The American Society of Geriatrics recommends a falls risk assessment carried out by a health care professional as one way to prevent falls in older adults.

Falls are **NOT** a normal part of aging! Let Therapy Advantage help you maintain your independence by conducting a falls risk assessment.

To learn more about all of the fall prevention services we offer, contact Therapy Advantage today!

Therapy Advantage now offers a unique and specialized therapy program for those living with Parkinson's.

LSVT is a clinically proven, intensive amplitude-based therapy for those living with Parkinson's. It is designed to augment your ability to move and speak at your maximum potential. LSVT utilizes the tenets of neuroplasticity to create changes in brain function. As a result, the brain is recalibrated to optimize movement and communication!

LSVT can be used in conjunction with your medication regimen as prescribed by your physician. This therapeutic program should begin at time of diagnosis and will be effective at any stage in your treatment. The sooner you begin, the sooner you'll have an improved quality of life.

What to expect from therapy conducted by a LSVT certified physical or speech therapist:

- Walking faster with bigger steps
- Improved balance
- Louder speech
- Bolstered brain function
- Increased mobility
